The Mercury banner stand is a popular and versatile retractable banner stand ideal for exhibition displays. The banner stand is available in four widths and can stand at three heights, allowing for maximum visual impact. The system has interchangeable graphics, allowing you to change the graphic message quickly and easily, without any tools. The Mercury banner stand is also available as a single or double-sided system. The complete system packs neatly away into a single lightweight carry bag.

A cassette banner stand is nothing more than a roller banner stand with the facility to remove and replace the graphic inside. When you want to change the graphics you can do so by simply removing the mechanism with the print pre-loaded onto it and replacing it with a new one. Changing the graphic takes a few minutes and in Mercury's case involves no tools at all.
